Policymaker Learning Pathway

Environmental SDG Indicators e-learning course

Name: Reeti Bora Mondal

Date: July 8, 2021

About the Learning Pathway:

The Learning Pathway for Policymakers comprises of three modules of this e-learning course: 1. Module 1: Measuring the environment, 2. · Module 8: Policy coherence for sustainable development, and 3. Module 10: Using environment statistics for national analysis and policy. This pathway aims to build the capacities of policymakers to use data on the environment-related SDGs for evidence-based decision-making.

Learning objectives:

Following the completion of the pathway, participants will be able to:

1. Explain the imporance of measuring the environment;
2. Identify how international statistical frameworks help improve environmental SDG reporting;
3. Discuss the imporance of policy coherence and its measurement;
4. Explain how environment statistics can inform the policymaking process;
5. Describe international standards, principles and procedures of international frameworks for data quality and production.
